video of lecture: Natural Gas: a Bridge to Nowhere?

Contributed by Jan Lundberg
03 October 2011

Jan Lundberg, independent oil industry analyst and eco-activist, spoke at the University of Oklahoma's petroleum engineering school for its Bridging Fuels for the Future Seminar Series, August 30, 2011.

Oklahoma's petroleum academia hosted this critic of the region's big hope: natural gas. In addition to upholding academic freedom, the University may have had to temper graduates' expectations of entry into lucrative jobs -- given the realities of fracking, peak oil, and climate change.

Watch Jan's lecture:

[This video will be available as a DVD at Culture Change's exhibit table at the Nov. 2-6 annual meeting of the Association for the Study of Peak Oil and Gas, Washington D.C.*]

Jan Lundberg speaking at University of Oklahoma's Devon Energy Hall on Aug. 30, 2011

[About that plastic water bottle, Jan says, "I wish I could say it was an intended prop, but when it was brought to me, at least I was able to hold it up as an example of petroleum!"]

For a written version of the speech based roughly on notes and Jan's outline, go to this article published in September on Culture Change:
Natural Gas: a Bridge to Nowhere? - Oklahoma's petroleum academia hosts critic
