Climate Change S.O.S. - painting

Contributed by Fernando Agudelo
04 October 2013

The size is 39 inches x 39 inches, oil on strectched canvas ready to frame. The selling price is to be $900-US.

The fossil fuels corporations are on the hot seat right now. Fossil fuels are the modern slavery, and have murdered millions of white, black, hispanics and asians, a mass Holocaust Worldwide. In my study, the number of deaths that the fossil fuel industry have caused surpass the number of the total deaths from the First and Second World Wars combined.

Perhaps you remember the Death Horse from Revelation (Apocalypse). Well, here it is, live and still killing. It's not a prophecy anymore. It Is Real.

Now it is time to stop those cold blooded killer CEOs. We will defeat the Fossil Fuels and those who work behind their lines.

The painting will be on auction at eBay.com, beginning on October 17, 2013 at 6:00 PM Pacific Standard Time. The item is number 2712885966133.
