"Losing My Culture" was deleted

Contributed by Jan Lundberg
31 December 2013

This article has been deleted. While I was aiming for something funny yet critical and informative, it's my New Year's "resovolution" to focus on all the positive that I can participate in and call attention to.

The article looked too much to my past and hammered on the negative. People love to hear that good efforts are happening to lift the world out of fossil-fueled & nuclear hell. And they are happening. My dedication is 100% to sail transport. And hopefully more music making! Have a good 2014. - Jan Lundberg
